

Greetings from the SECME National Office:

You are receiving this email as a current or former partner or participant with SECME programs. As you may know, SECME is a 501c-3 non-profit organization whose goal is to interest and prepare underrepresented students for college and careers in science, technology, engineering and math (STEM).

As a non-profit, SECME relies on grants and contributions to facilitate STEM competitions, student programs, teacher training and student scholarships in under-served communities. Each year SECME works with more than 7,000 students in 13 states, D.C. and the Bahamas. Seventy eight percent (78%) of our participating students are minority, forty two percent (42%) are female and fifty seven percent (57%) are first generation college-goers. These students often don't have the funds or the mentors to facilitate their participation in the types of K-12 activities which would prepare them for college and careers in STEM. SECME provides these opportunities, along with college campus experiences, scholarships and STEM materials & supplies at little or no cost to students.

This year SECME is participating in Georgia Gives Day, a fundraising campaign designed to assist non-profits located in Georgia in raising funds to further their missions nationwide. We are writing to ask your support. With an annual budget of less than \$1million dollars, every donation counts! \$5? \$50? More? We hope you'll make a contribution to help SECME continue its efforts to prepare underrepresented students for college and careers in STEM nationwide.

**[CLICK HERE TO MAKE YOUR DONATION TO SECME](#)**

You can make your donation now through  
November 27  
(Giving Tuesday)!
